

KleenCheck Plus-FR6

KleenCheck Plus-FR6 is for the cleaning of less critical areas which is often done by cleaners without any access to technology in their day-to-day work. The application enables all cleaners to have a personalised online induction to the organisation and be given details of all key policies. There is the facility to require Cleaners to confirm acceptance of policies when necessary. In addition, mandatory training modules can be delivered with reminders when refresher training required. Cleaners can find and download details of cleaning locations and download cleaning routines. All material can be personalised to specific groups of cleaners.

KleenCheck Plus-FR6 from the KleenCheck range.

Direct orders from sales@theorange.com

- ❖ Makes training and delivery of policies and information easier to carry out

The National Standards of Healthcare Cleanliness 2025

The National Standards of Healthcare Cleanliness 2025 apply to all healthcare organisations and replace the National Standards of Healthcare Cleanliness 2021. To encourage continuous improvement they combine guidance, recommendations and good practice across all healthcare settings. The 2025 version now encompasses the various challenges in ambulance facilities.

Licences for KleenCheck Plus FR6 are available via NHS Supply Chain by negotiation, this enables a single licence to cover use throughout an entire site. Bespoke packages are also available to include KleenCheck Pro Audit and KleenCheck Pro FR1, these enable your specific needs to be covered, whilst only paying for what you need and having all your records in one place.

Or order via sales@theorange.com

Setting up is quick and easy. You provide us with your area structure to be cleaned, we will replicate this on KleenCheck, and the policies you want included. We will create initial administrators and provide full training.

All that's left to do is to create your routines and start cleaning.

KleenCheck Pro-Audit

Makes delivery of the audits required by the The National Standards of Healthcare Cleanliness 2025 easier to carry out, by having all the relevant audit locations clearly laid out for each and a simple button for the rating. Data is then instantly transferred to a central point where the required calculations are carried out. The audit frequency for every area is set in the system, the allocation of schedules is electronically communicated to auditors enabling them to see the forward requirement of their audits and plan implementation. Auditors and Line Managers can be sent an email to remind them when audits are due. Areas where corrective action is required can be identified. Managers have a dashboard showing key information for all the areas they oversee. Order direct from sales@theorangegroup.com
KleenCheck PRO-Audit is available via NHS Supply Chain, where you can view the PRO-Audit data sheet.

KleenCheck Pro-FR1

As the name suggests for managing cleaning routines for High-Risk Areas such as theatres and pharmacy clean rooms. It enables step by step instructions for cleaning high risk areas to be easily created. Cleaners are required to confirm completion of each critical step; this is recorded and time stamped. If problem areas are identified KleenCheck provides the ability to easily create and test revised protocols. It enables the allocation of schedules to cleaners and enables cleaners to see their forward schedules. Cleaners can be sent email reminders if required. All data is stored centrally as soon as recorded and analysis and reports can be set up as required locally. The Cleaning Manager has a Dashboard of key indicators which they chose. In areas serving the public data on cleaning activity can be displayed electronically. Order direct from sales@theorangegroup.com
KleenCheck PRO-FR1 is also available via NHS Supply Chain, where you can view the PRO-FR1 data sheet as well as the data sheet for 'Displaying live data on display screens' using KleenCheck PRO- FR1 and 'Bespoke cleaning routines for critical problem areas' using KleenCheck PRO-FR1

KleenCheck Plus-FR6

Again, as the name implies this is for the cleaning of less critical areas which is often done by cleaners without any access to technology in their day-to-day work. Access to the web needs to be provided for them. The App enables all cleaners to have a personalised online induction to the organisation and be given details of all key policies. There is the facility to require Cleaners to confirm acceptance of policies when necessary. In addition, mandatory training modules can be delivered with reminders when refresher training required. Cleaners can find and download details of cleaning locations and download cleaning routines. All material can be personalised to specific groups of cleaners. After cleans are completed there is the facility for cleaners to confirm completion of a routine. Cleaning Managers and Supervisors have an audit package to check performance. A dashboard of key indicators chosen by the cleaning manager provides an overview of all activities. Order direct from sales@theorangegroup.com or via NHS Supply Chain
